DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-12, 19, 26, 53, 57, drawn to method of implanting a tool, classified in class 606, subclass 191.
- II. Claim 47, drawn to an implantable surgical device, classified in class 606, subclass 194.

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the device of group II can be used for many different purposes, such as creating an anastomosis.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

This application contains claims directed to the following patentably distinct species of the claimed invention:

Various species of the use of the device are claimed. Election of one species is required if applicant elects group I above. The claims listed are some of the suggested claims for that election. Applicant is required to recite all the claims & figures that read on the elected invention.

A) A method of reversing blood flow in a cerebral artery comprising: locating a first constricting member in:

1. the right brachiocephalic artery, claim 1
2. the right subclavian artery, claim 12
3. the left subclavian artery, claim 19
4. the left common carotid artery, claims 26 & 57
5. the right common carotid artery, claim 53

B) If applicant chooses A 1, applicant must choose between one of the four following inventions wherein the blood flow is reversed in:

1. the right common carotid artery, claim 2
2. the right internal carotid artery, claim 3
3. the right external carotid artery, claim 4
4. the right vertebral artery, claim 5

C) If applicant chooses A 1, applicant must additionally elect an invention wherein the interventional catheter is

1. an angioplasty catheter, claim 8
2. an atherectomy catheter, claim 9
3. a stent delivery catheter, claim 10

Art Unit: 3731

If applicant chooses A 4, applicant must elect a method between the species where the second constricting member is located in the aorta downstream of the

1. right brachiocephalic artery claim 57
2. left brachiocephalic artery claim 26

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, none appear generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Art Unit: 3731

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

A telephone call was made to John Kappos on May 11, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
